

EJP SERIES

The EJP series is ideal for demanding applications requiring high efficiency, torsional rigidity and zero backlash. It's lightweight, black anodized aluminum housing and dual input/output seals allow for excellent environmental protection with minimal maintenance. The EJP is part of our modular design platform, which means it can be mounted to any servomotor manufacturer with ease.

Our internal design captures both sides of the gear tooth to completely eliminate backlash and guarantee it for the life of the product. Exact reduction ratios allow for simplified servo tuning. Ratios 5:1 through 60:1 are available in a single stage, resulting in a more compact design. The face mounting option gives customers the ability to directly attach components such as tables, pinion gears and timing belt pulleys, eliminating the need for couplings.

EJP SERIES

- Performance leader in its category
- High positional accuracy and torsional rigidity combined with low noise and exceptionally smooth operation. Zero backlash available
- Wide range of output mounting options
- Compact design – up to 60:1 available in a single stage configuration

EJP SERIES Right-angle Worm

EJP Series Features

- ① Globoidal gear set – between 3-8 teeth in contact at once, allowing 300% shock load capacity
- ② Adapter-bushing connection allows simple mounting to virtually any servomotor manufacturer
- ③ Wide range of output mounting styles available – hollow shaft, solid shaft, face mount, shrink disc
- ④ Double oil seal and o-ring provide IP65 protection
- ⑤ Ball bearings help reduce friction and heat
- ⑥ Anodized, thermally efficient aluminum housing

EJP Series Model Code

EJP Dimensions – Solid Output Shaft

- *1) Dimensions apply to zero backlash models only
- *2) Dimensions in parentheses apply to zero backlash models only

- *3) Dimensions are dependent on the input bore diameter ($\leq \varnothing 14$, $\leq \varnothing 19$, $\leq \varnothing 28$, $\leq \varnothing 38$)
- *4) Dimensions are dependent on the motor mounting dimensions

EJP SERIES Right-angle Worm

EJP Dimensions – Flange Output

- *1) Dimensions apply to zero backlash models only
- *2) Dimensions in parentheses apply to zero backlash models only
- *3) Dimensions are dependent on the input bore diameter ($\leq \varnothing 14$, $\leq \varnothing 19$, $\leq \varnothing 28$, $\leq \varnothing 38$)

- *4) Hollow bore diameter tolerance is H8 for EJP38 only
- *5) 4 tapping holes for EJP38 only
- *6) Dimensions are depend on the motor mounting dimensions
